Soundstring Omega Pro Line microphone cables [Review](#)

These custom made mic cables may be the inaugural "recording creations" of the Soundstring Cable team. Yet, regardless of heritage, Soundstring has crafted a revealing microphone cable that achieves a lovely richness of sonic texture with a minimum of dynamic loss, sonic glare and signal noise. Microphone cables are not built equally. Each brand and iteration is eccentric in one way or another. These are distinct in their generous reproduction of transient information free of grunge.
